Yueh-Hua Wu

+886 934 353 604 <d06922005@csie.ntu.edu.tw>

EDUCATION

National Taiwan University (NTU), Taipei, Taiwan *Sept. 2017 - PRESENT*
Master of Science in Computer Science and Information Engineering

National Taiwan University (NTU), Taipei, Taiwan *Sept. 2013 - Jun. 2017*
Bachelor of Science in Electrical Engineering

- Cumulative GPA: 3.85/4.00
- Related courses:
  - Mathematics: Linear Algebra, Differential Equation, Discrete Mathematics, Stochastic Process, Probability and Statistics
  - Computer Science: Convex Optimization and Machine Learning, Artificial Intelligence, Artificial Neural Network, Genetic Algorithm, Algorithm Design and Analysis, Data Structure and Programming, Operating Systems

RESEARCH INTERESTS

Reinforcement Learning, Machine Ethics, and Social Network.

AWARDS & HONORS

- Winner, Microsoft WSDM Cup *2016*
- Ph.D. Student Scholarship, Ministry of Education, Taiwan *Sep. 2017 - Jan. 2019*
- Outstanding Students Scholarship, Tainan City United Workers Association *Sep. 2013*

RESEARCH EXPERIENCES

NTU - Machine Discovery and Social Network Mining Lab *Feb. 2015 - PRESENT*
Undergrad. (before Jul. 2017) / Ph.D. (after Jul. 2017) Research Assistant
Advisor: Shou-De Lin, Department of Computer Science and Information Engineering

Research Project: **Robust Reinforcement Learning**

- Developed general reinforcement learning frameworks to make the learning process faster and to make the performance more robust with respect to hyper-parameters.
- Incorporated reinforcement learning with hyper-parameter optimization (e.g., bayesian optimization) and adaptive tuning approaches so that reinforcement learning models perform consistently well without much human efforts.

Research Project: **Ethical Decision Making**

- Proposed a high-level framework to train an ethical RL agent based on a regular reward function together with certain human data optimizing diverse objectives.
- Designed the ethics shaping model to adjust the reward function through the interaction between the RL and human policy.
- Coined three scenarios *Grab a Milk*, *Driving and Avoiding*, and *Driving and Rescuing* to show how ethics shaping balances ethical behavior and performance pursuit.

Research Project: **Community Detection**

- Proposed a multi-view community detection approach with multiple node similarity matrices.
- Trained the model unsupervisedly with triple matrix factorization while preserving a matrix shared with all views.
- Visually and mathematically analyzed state-of-the art community detection algorithms with real-world networks.

NTU - Department of Electrical Engineering *Sep. 2013 - Oct. 2017*
Research Assistant
Advisor: Prof. Jian-Jiun Ding, Department of Electrical Engineering

Research Project: **Singular Value Decomposition for Fast Compressive Sensing**

- Proposed a signal-dependent framework to select suitable atoms with upper error bound for $l1$-norm minimization.
- Deployed singular value decomposition to approximate the atom dictionary used for compressive sensing.

Ministry of Science and Technology *Apr. 2015 - Apr. 2016*
Research Assistant
Advisor: Prof. Tseng-Nan Lin, Department of Electrical Engineering

Research Project: **Face Recognition on Frequency Domain**

- Cooperated with outstanding researchers to conduct hands-on experiments on face recognition.
- Surveyed face recognition approaches and conducted experiments to compare their performances.

WORK EXPERIENCES

RIKEN Center for Advanced Intelligence Project *July. 2018 - Jan. 2019*
Researcher Intern
Advisor: Masashi Sugiyama

Research Project: **Learning from Imperfect Demonstrations**

Groundhog Technologies Inc. *Apr. 2016 - Dec. 2017*
Data Scientist Intern

Research Project: **Real-Time Bidding Machine**

- Transformed images and keywords of advertisements to informative features with Word2vec and semi-supervised dimensionality reduction.

- Designed an ensemble model that took input from Neural Net models and factorization machines.

SELECTED COURSEWORKS AND PROJECTS

Genetic Algorithm for Cluster Ensemble *Fall 2016*
Final Project of Genetic Algorithm

- Utilized Genetic Algorithm to solve non-convex optimization in cluster ensemble.
- Achieved better accuracy than convex approaches with efficient optimization in non-convex domains.

Mental Disease Classification with Neural Nets *Fall 2015*
Final Project of Psychoinformatics and Neuroinformatics

- Crawled mental disease labels and features from PTT forum.
- Predicted delusional disorder symptom with TF-IDF and Neural Net and achieved 0.83 accuracy.

Wireless Oscilloscope with Arduino and Bluetooth module *Fall 2015*
Final Project of Electronic Circuits Experiments (III)

- Designed a wireless device to replace cumbersome wires between circuits and oscilloscopes.

RELATED SKILLS

- Standardized Test
  - TOEFL score: 97/120 (R:26/30, L:26/30, S:22/30, W:23/30) Oct. 2016
- Programming: Python, Matlab, C++, LaTeX
